Goals	Successfully using the scrum framework to create a software that is complete, has no bugs, doesn't break and fulfills all given requirements.		Signature
Meeting norms	Wednesday meeting is mandatory for everyone, other separate meetings for the people involved (may vary). Being on time is mandatory. Delays or no-shows (e.g. sickness) have to be announced ASAP, at least before the start of the meeting. Team meeting should be structured and held according to SCRUM. Actual work has to be done during the sprint and/or in separate meetings.		Florian Schels
Working norms	criticism only on professional level; try to solve issue directly, if not possible contact the SM, if still no solution make it part of the team meeting		Maximilian May Andreas Hellmich
Coordination norms	Agree with FS and AM. POs responsible for technical coordination, SM responsible for ideal implementation of SCRUM Framework and team issues. Ideally SM involvement declines over time. If Meeting is requested by SD to solve misunderstandings they should select the Meeting leader		
Communication norms	Informal communication via Whatsapp. Technical communication via Slack. Respond within 24h max (and if it's just "I'll look into it at x"); Communicate illness/delays once noticed; If anything is not clear, communicate that immediately.		
Consideration norms	no side conversations during meetings		Tejesh Pala
Cont. improvement norms	team progress is tracked using project board. Impediments backlog is discussed in team meeting.		Uday Varun Kothapalli
Rewards	If sprints are successful, no additional meetings are necessary ;)		Tariq Hussain Magsi
Sanctions	No Sanctions for now - might be added later"		Fazeel Arif
