# Sitecom Harvest

- The stated link [https://github.com/MikimotoH/Sitecom_Harvester](https://github.com/MikimotoH/Sitecom_Harvester) is 7 years old, the code contains broken links and there is no info provided by the developer on how to run the code.
- We get to know about the website of Sitcom [https://www.sitecom.com/de/](https://www.sitecom.com/de/)
- It is a website that sells laptops and electronics products e.g., WIFI modules.
- There is a search section where you can look for the appropriate firmware to download.
- In these categories, there are sub-categories. product name-> support.

- You can download the sitcom firmware update of that product from the download option.

Challenges

The readme file is empty, and the developer has provided no details on how to run the code and solve the dependencies issue. So it is a big challenge to see what the code is doing and if it is useful or not.s
